

Come and hear about ConfiDent^{ABC}

New Course Launch

16 - 17 . 2 . 2018

Venue:

Hygeia Hospital,
Erithrou Stavrou 4,
Marousi 151 23, Greece

Conducted by:

Prof. Adi Lorean

ConfiDent ABC, part of the Adin Group, is proud to present the **SafeGuard** DSG technology. Derived from the world of orthopedic surgery, it is a **revolutionary method** for the placement of dental implants!

We invite you to be part of a very exclusive, highly professional, leading team of the DSG technology. The DSG™ (Dynamic Surgical Guidance) Technology is based on the principle that the electrical conductivity of tissue varies by the tissue type. Electrical conductivity is the distinctive ability of a material to conduct an electrical current.

The Technology:

- > Has a bipolar sensor creating a circular electromagnetic detection field at the very tip of the instrument.
- > The changes in electrical conductivity of the bone translated into audio and visual feedback that varies in pitch and cadence.
- > The result is that **SafeGuard** can alert the surgeon in real time about a possible breach.

Reduces Surgical Time

Easy to Operate

Reduces Radiation Exposure

Global Training Program

SafeGuard

Course fees: 290€

The course includes theoretical, hands-on and practical elements on patients. Each participant receives an extra **SafeGuard** for clinical use.

Limited space for 12 participants

Save your seat!
